

About Me

I am a motivated and curious IT student with a foundational understanding of computers, Microsoft Office tools, and basic web development. I have been exploring front-end technologies such as HTML, CSS, and JavaScript, and I'm gradually building my skills toward becoming a full-stack developer. Eager to learn and grow, I am looking for opportunities where I can apply my knowledge, gain hands-on experience, and develop both personally and professionally in a supportive, growth-focused environment
